

IBD BENCHMARKING 2023

RESULTS OVERVIEW - PAEDIATRIC SERVICE

MAIDSTONE HOSPITAL AND TUNBRIDGE WELLS
HOSPITALS (PAEDIATRIC)

www.ibduk.org

This report shows results from the IBD UK benchmarking in 2023, which includes the IBD Patient Survey and Service Survey. Service Survey data appears only for those IBD services that took part, and Patient Survey data appears only where more than five patients from this IBD service completed the IBD Patient Survey. This report has been produced by IBD UK, a partnership of patient and professional organisations working together for everyone affected by IBD. This report was published in March 2024.

Key

- IBD Patient Survey 2023
- IBD Service Survey 2023

The Service in Numbers

Covers a population of

1500000

Supports

75

Paediatric IBD patients

Of which

-

were diagnosed in the
past 12 months

The IBD Team

Quality of Care

Overall, how would you rate the quality of your Crohn's or Colitis care over the last 12 months?

Unfortunately, no information can be included here due to insufficient numbers of patients (less than 5) responding to the IBD Patient Survey for this service.

These results have been made publicly available to support clinicians, patients and commissioners to improve quality of care for IBD patients. Thank you to everyone who responded to the IBD Patient Survey 2023.

Patient Journey Overview

Key

IBD Patient Survey 2023

IBD Service Survey 2023

Pre-diagnosis

All patients with IBD are
seen within 4 weeks from
their first referral

Achieved

[Achieved by 30% of services]

Newly Diagnosed

All newly diagnosed
patients are offered
written information on
their condition

Achieved

[Achieved by 100% of services]

% of patients attended A&E
before their diagnosis

[Insufficient data: less than 5 responses]
[All UK survey responses: 47%]

New diagnoses and the
care plan that has been
agreed are communicated
to GPs within 1 week

Achieved

[Achieved by 78% of services]

Flare Management

% of patients contacting the
IBD advice line get a
response within 2 working
days

[Insufficient data: less than 5 responses]
[All UK survey responses: 81%]

Achieved

A process exists for
communication of a
management plan for the
optimization of IBD care within
5 working days of a flare

[Achieved by 100% of services]

% of patients were given
clear information before
their operations

[Insufficient data: less than 5 responses]
[All UK survey responses: 92%]

Surgical outcomes are regularly
audited for elective IBD surgery

[Achieved by 35% of services]

Achieved

All inpatients with IBD are seen
by a gastroenterologist within 24
hours of emergency admission

Achieved

[Achieved by 83% of services]

All elective IBD surgery takes
place within 18 weeks

Achieved

[Achieved by 95% of services]
